

# ZHENHUA XU

Hong Kong SAR, China

✉ [zxubg@connect.ust.hk](mailto:zxubg@connect.ust.hk)

🏠 [Homepage](#)

🐙 [Github Page](#)

🔍 [Google Scholar](#)

## Position

### Tsinghua University

Postdoc (Shuimu Scholar) in School of Vehicle and Mobility, work with [Prof. Jianqiang Wang](#)

Sep. 2024 – Current

Beijing, China

### The University of Hong Kong

Postdoc, work with [Prof. Hengshuang Zhao](#)

Apr. 2023 – Jul. 2024

HKSAR, China

## Education

### Hong Kong University of Science and Technology

Ph.D. of CS. **HKPFS** awardee. Supervised by [Prof. Ming Liu](#) and [Prof. Huamin Qu](#)

Sep. 2018 – Mar. 2023

HKSAR, China

### University of California, Los Angeles

CSST (Cross-disciplinary Scholars in Science and Technology) program (GPA 4.0/4.0)

Jul. 2017 – Sep. 2017

LA, USA

### Harbin Institute of Technology

Bachelor in Electronics and Information Engineering (Score 91.19/100, **ranking 1/88**)

Sep. 2014 – Jun. 2018

Harbin, China

### Zhengzhou Foreign Language School

Sep. 2011 – Jun. 2014

Zhengzhou, China

## Research Keywords

Autonomous Driving, Large Language Model, High-definition Map, Robotics, Computer Vision

## Research Experience

### Large Language Model for Autonomous Driving | Robotics, Computer vision

2023-Current

- Autonomous vehicles promise reduced traffic, fewer accidents, and increased sustainability. However, a key challenge is achieving explainable autonomous driving, where AI systems transparently justify decisions—essential for commercialization and addressing safety, ethical, and legal concerns.
- The emergence of large language models (LLMs, e.g., ChatGPT, GPT4) enhances explainable autonomous driving by translating technical data into everyday language, providing context-aware AI explanations, and augmenting training. They also address ethical and legal concerns, fostering trust and seamless human-AI interactions.
- We propose leveraging large language models (LLMs) to demystify autonomous driving. LLMs are trained to control vehicles like humans and offer conceptual explanations for each specific action, enhancing transparency and understanding.
- Several research academic research projects are ongoing.

### Vector Map Creation | Robotics, Computer vision

2019-Current

- Vector maps, including standard and high-definition maps, are crucial for autonomous vehicles as they supply navigation and planning algorithms with vital information about static line-shaped objects like road boundaries and networks. However, manual creation is inefficient and labor-intensive. Thus, there is a need for efficient and effective methods to automatically generate vector maps of target objects.
- Our team proposed to handle this problem from multiple aspects, such as offline global map construction by imitation learning, online map detection by transformers, and graph manipulation. All projects achieved promising results.
- Multiple papers including 8 first-author papers are accepted by top journals and conferences in the robotics communities (e.g., RA-L, ICRA, IROS, ECCV, TGRS).

## Preprints

## Awards and Honors

---

- **2024-2026** Shuimu Tsinghua Scholar
- **2018-2022** HKPF (Hong Kong PhD Fellowship)
- **2018** Outstanding Graduate of Harbin Institute of Technology
- **2018** Guanghua Scholarship
- **2017** UCLA CSST (Cross-disciplinary Scholars in Science and Technology)
- **2017** National Scholarship
- **2016** Meritorious Winner in MCM/ICM
- **2014-2018** Renmin Scholarship
- **2014-2018** University Merit Student
- **2013** Provincial 1st prize in National High School Mathematics League (NO.49)

## Academic services

---

- **Organizing committee:**
  - 2024 ICML Workshop, Multi-modal Foundation Model meets Embodied AI (MFM-EAI)
- **Reviewer:**
  - IEEE Robotics and Automation Letters (RA-L)
  - IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS)
  - IEEE/RSJ International Conference on Robotics and Automation (ICRA)
  - Conference on Computer Vision and Pattern Recognition (CVPR)
  - Conference on Neural Information Processing Systems (NIPS)
  - AAAI Conference on Artificial Intelligence (AAAI)
  - IEEE Transactions on Geoscience and Remote Sensing (TGRS)
  - International Journal of Computer Vision (IJCV)
  - The British Machine Vision Conference (BMVC)
  - Autonomous Vehicle Vision (AAV)
- **Teaching assistant:**
  - COMP3711 (Design and Analysis of Algorithms)
  - COMP3311 (Database Management Systems)
